

Trials for ISU-Awards 2022

In cooperation with KVBC
(Royal Boskoop Horticultural Society)

Ronald Houtman / Marion Lijmbach
Secretary / 2nd Secretary Trials Committee KVBC

Boskoop, Netherlands
7 August 2022

Applications:

Plant	Applicant
Acanthus mollis 'Heutinck'	Plantipp BV, IJsselstein, Netherlands
Agapanthus 'Appy' (HAPPY BLUE)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agapanthus 'Heidy' (PRETTY HEIDY)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agapanthus 'Noagcar' (CARBONELLA)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agapanthus 'ZW12' (AZURRO)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agapanthus 'Rolyn' (PRETTY ROLYN)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agapanthus 'Sandy' (PRETTY SANDY)	Marco van Noort Breeding B.V., Warmond, Netherlands
Agastache 'Danish D' (DANISH DELIGHT)	Future Plants Licentie B.V., Lissersbroek, Netherlands
Allium 'Avat 88' (AVATAR)	Future Plants Licentie B.V., Lissersbroek, Netherlands
Allium 'Chivette'	CNB (U.A.), Lisse, Netherlands
Anemone hybrida GARDEN BREEZE PINK TOUCH	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Anemone hybrida GARDEN BREEZE PINK WHIRLWIND	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Astrantia 'Noastone' (PINK BUTTON)	Marco van Noort Breeding B.V., Warmond, Netherlands
Astrantia 'Noastwo' (CERISE BUTTON)	Marco van Noort Breeding B.V., Warmond, Netherlands
Astrantia 'Noastwo' (CERISE BUTTON)	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Betonica officinalis 'Summer Sweets'	Future Plants Licentie B.V., Lissersbroek, Netherlands
Centaurea montana 'Tini's Pink'	Rijnbeek Perennials, Boskoop, Netherlands
Chrysogonum virginianum 'Pierre'	Vilier Vasteplanten, Boerdonk-Erp, Netherlands
Crocsmia 'Crowing Rooster'	Rijnbeek Perennials, Boskoop, Netherlands
Echinacea 'MVNE1502' (SENSATION CORAL)	Marco van Noort Breeding B.V., Warmond, Netherlands
Echinacea 'MVNE172' (MEDITATION CHERRY)	Marco van Noort Breeding B.V., Warmond, Netherlands
Echinacea 'MVNE172' (MEDITATION CHERRY)	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Echinacea 'MVNE177' (MEDITATION ORANGE)	Marco van Noort Breeding B.V., Warmond, Netherlands
Echinacea 'Noecseven' (PICKUP PINK)	Marco van Noort Breeding B.V., Warmond, Netherlands
Echinacea 'Noecsix' (DRUMSTICK YELLOW)	Marco van Noort Breeding B.V., Warmond, Netherlands
Epimedium pinnatum 'Magnificent'	CNB (U.A.), Lisse, Netherlands
Euphorbia 'Galaxy Glow'	Plantipp BV, IJsselstein, Netherlands
Geranium 'MVNG1402' (CONFETTI)	Marco van Noort Breeding B.V., Warmond, Netherlands
Geranium phaeum 'Wendy's Blush'	Rijnbeek Perennials, Boskoop, Netherlands
Geranium wallichianum 'Bocoalsbl' (MAGICAL JOY)	Boot & Dart Boonkwekerijen bv & Kolster BV, Boskoop, Netherlands
Geum coccineum 'Stocrgau' (FIERY RED)	Rijnbeek Perennials, Boskoop, Netherlands
Heliopsis helianthoides 'Bleeding Heart'	Jelitto Staudensamen GmbH, Schwarmstedt, Germany
Heliopsis helianthoides 'Fire Twister'	CNB (U.A.), Lisse, Netherlands
Heliopsis helianthoides 'Funky Spinner'	CNB (U.A.), Lisse, Netherlands
Heuchera 'MS2020' (MAPLE SYRUP)	Rijnbeek Perennials, Boskoop, Netherlands
Heuchera 'PP2020' (POOLS OF PURPLE)	Rijnbeek Perennials, Boskoop, Netherlands
Heuchera 'Rex Black'	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Heuchera 'Rex Fire'	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Lavatera 'Duet'	Future Plants Licentie B.V., Lissersbroek, Netherlands
Leontopodium alpinum 'Berghman' (BLOSSOM OF SNOW)	Vilier Vasteplanten, Boerdonk-Erp, Netherlands
Limonium gmelinii 'STE 10' (DAZZLE ROCKS)	Plantipp BV, IJsselstein, Netherlands
Lychnis flos-cuculi 'Petit Henri'	Vilier Vasteplanten, Boerdonk-Erp, Netherlands
Lychnis viscaria 'Yatnis' (SNOW CLOUD)	Vilier Vasteplanten, Boerdonk-Erp, Netherlands
Lythrum virginicum 'Joy'	Future Plants Licentie B.V., Lissersbroek, Netherlands
Miscanthus sinensis 'Polonus'	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Penstemon digitalis 'Midnight Masquerade'	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Penstemon digitalis 'Onyx and Pearls'	Vitroflora Grupa Producentów Sp.z. o. o, Dobrcz. Poland
Rudbeckia fulgida 'American Gold Rush'	Future Plants Licentie B.V., Lissersbroek, Netherlands
Salvia 'Bocoffla' (FEATHERS FLAMINGO)	Plantipp BV, IJsselstein, Netherlands
Salvia 'Bocofpea' (FEATHERS PEACOCK)	Plantipp BV, IJsselstein, Netherlands
Salvia sylvestris 'Sally2014' (PURPLE SPRING)	Rijnbeek Perennials, Boskoop, Netherlands
Schizachyrium scoparium 'Ha Ha Tonka'	Future Plants Licentie B.V., Lissersbroek, Netherlands
Sedum 'Dream Dazzler' (SUNSPARKLER)	Plantipp BV, IJsselstein, Netherlands

SENDER Person name or Company name: **Plantipp BV**

1.

ISU-member: yes

Street: Brunel 21

Postalcode/Town/Country: 3401 LJ

Email: kim@plantipp.eu

Phone/Fax: +32468534823

Name: **Acanthus mollis 'Heutinck'**

Origin of the cultivar (seedling of..., sport of..., hybrid of... etc.): **Seedling**

Originator / Breeder or Selector: **Peter Heutinck**

Year of origin: **2014**

Introducer to the Commercial market* (company name and adress): **Plantipp BV and Future Plants**

Year of introduction: **Not yet introduced**

Does the cultivar enjoy any type of protection rights such as trademark or breeder's rights if yes which one:
Not yet

Was the variety apply to award before/when? **No**

How different/ which is the most similar existing var.: **more compact, pink flowers (instead of fully white)**

Short description of the cultivar leaves, flowers:

'Heutinck' is a more compact variety than other Acanthus. Glossy, green, lobed leaves. Flowers tubular. It was also selected because of its pink with white flowers. This combines beautifully with the purple flower bracts. 'Heutinck' is winter hardy, drought-tolerant (once established) and bee-friendly. Very suitable for xeriscaping.

Way of propagation and the preferable method: **TC or rhizomes**

Growth and habit (erect, compact ...): **Compact**

Height (cm): leaves/with flowers: **ca. 70-80 cm (incl. flower spikes)**

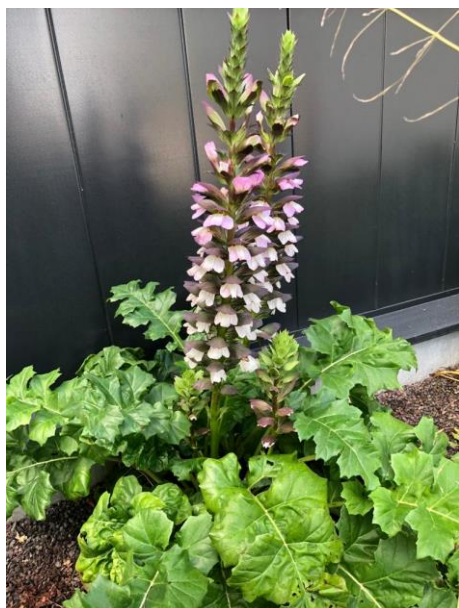

Main flowering time: **Summer**

How to cultivate - preferable place: soil, humidity, stand (shadow, half shadow, sunny):

Well-drained soil (not too poor), full sun to partial shade

Photo applicant:

25-6-2021: planted,
relatively small plants,
looking healthy

Name: **Agapanthus 'Appy' (HAPPY BLUE)**

Family: **Agapanthaceae**

Min height: **50 cm**

Max height: **60 cm**

Description: **Richly flowering variety with bright blue flowers. Also suitable as cut flower. For patio planting or sunny border. After flowering, the plant produces beautiful seed pods that show their ornamental value until winter. Reasonably hardy.**

Origin: **Jan Zwetsloot, Voorhout, Netherlands, 2005**

Introduction: **2014**

Flowering time: **July-September**

Colour: **Clear blue**

Requirements: **full sun**

Photo applicant:

25-6-2021: planted,
good quality plants

14-9-2021: plants developed,
some flowers

19-4-2022: plants developing

Phone/Fax: +31 6 22505888

Name: **Agapanthus 'Heidy' (PRETTY HEIDY)**

Family: **Agapanthaceae**

Min height: **80 cm**

Max height: **90 cm**

Description: **Dark blue medium-high form with fresh green leaves that give a nice contrast. The dark blue flowers have a light colour with light blue stripes on the inside. The flowers "look at you". Continues to bloom for a long time because new flower stems keep coming. Suitable as a cut flower but also as a large tub plant.**

Origin: **Jan Zwetsloot, Voorhout, Netherlands, 2005**

Introduction: **2014**

Flowering time: **July-September**

Colour: **Dark blue**

Requirements: **sunny/semi-shade**

25-6-2021: planted, size acceptable, looking healthy

Photos applicant:

14-9-2021: plants developed, flowering

19-4-2022: plants developing

Name: **Agapanthus 'Noagcar' (CARBONELLA)**

Family: **Agapanthaceae**

Min height: **70 cm**

Max height: **80 cm**

Description: **This Agapanthus clearly has a nice contrast because of its light green-yellow leaves. In the beginning of the season it gives a nice contrast in the garden or terrace. Around June the first flower stems will appear almost black followed by dark blue flowers. The stems remain dark purple during and after flowering. After flowering, a finale of beautiful seed heads follows, which show a splendid winter silhouette. Highly recommended for the garden or tub!**

Oorsprong: **Jan Zwetsloot, Voorhout, Netherlands, 2014**

Introduction: **2021**

Flowering time: **July-September**

Colour: **Dark blue**

Requirements: **full sun/semi-shade**

Photos applicant:

25-6-2021: planted, good to excellent plant size, looking healthy

14-9-2021: plants developed, flowering

19-4-2022: plants developing, leaves slightly damaged by late frost

Name

Agastache 'Danish D' (DANISH DELIGHT)

Origin of the cultivar **Hybrid**
 Originator/Breeder or selector **Tina Møller (Stauden Marken Danmark)**
 Year of origin **2017**
 Introducer to the commercial market **Future Plants**
 Year of introduction **2020**
 Protection rights **EU BR applied for; US PP applied for; CAN PBR applied for; EUIPO trademark**

Was the variety applied to award before **No**

How different/which is the most similar existing var. **First bright pink, vigorous, Agastache ever. Hardy, even in wet conditions. Strong medium sized roots, good survival ability in bareroots production.**

Short description of the cultivar leaves, flowers etc. **Bright pink flower colour. Big pink flower with numerous flowers per spike/large inflorescence size. Fresh green leaf colour early spring appearance, reblooming cutflower.**

Way of propagation and the preferable method **Shoot tip cuttings**

Growth and habit **Upright plant habit, tall long-lasting seedheads**

Height (cm) **90**

Main flowering time **June into September**

How to cultivate **From cuttings about 5 to 6 months are required to produce fully grown flowering plant**

special culture remarks **Plant spreads a sweet minty fragrance when touched, typical for Agastache**

Flower colour **Bright pink (RHS NN74C)**

Size and form of single flower **Inflorescence, terminal verticillaster, up to 12 cm**

Complete flowers **Terminal verticillaster up to 12 cm in length, individual flowers in whorls of about 80**

Protection rights

EU BR applied for; US PP 32.409 ; BOIP trademark

Was the variety applied to award before

No

How different/which is the most similar existing var.

Stong basal growth habit, long flowering time (up to 4 weeks longer than Allium 'Summer Beauty')

Short description of the cultivar leaves, flowers etc.

Umbel, flattened globular. Freely flowering.

Flowering period from first buds appearing to seed development is extremely long.

Way of propagation and the preferable method

Division

Growth and habit

Broad obovate, with inflorescences growing from the base of the plant. No lateral branches.

Height (cm)

25, flowers up to 55

How to cultivate

By division, at the right time it will take 3-5 months to produce a fully grown flowering plant

special culture remarks

When crushed, the leaves spread an onion-like fragrance, typical for Allium

Flower colour

Purple-pink (in between 76D and N155A, central band darker; 76A)

Size and form of single flower

Umbel, flattened globular

Description of the leaves

In basal rosettes, equitant. Green to yellow-green; in between 143A and 144A but slightly darker.

Astrantia 'Noastone' (PINK BUTTON)

Family: **Apiaceae**

Min height: **40**

Max height: **50**

Description: **Compact, dense Astrantia that flowers easily with light pink flowers. Stays a bit more compact than other varieties but is also very suitable as cut flower. Easily fills a 3 litre container in 12 to 14 weeks.**

Flowers are very strong and resistant to bad weather conditions.

Origin: **Warmond**

Flowering time: **May-August**

Colours: **Pink**

Location: **full sun/semi-shade**

Photo applicant:

No

How different/which is the most similar existing var.

short, very healthy looking and vigorously growing Betonica with soft pink coloured flowers.

Short description of the cultivar leaves, flowers etc.

Main branches grow from the base, no lateral branches present. Problem free green foliage.

Way of propagation and the preferable method

Cuttings, division

Growth and habit

Ovate, broad upright growth habit

Height (cm)

30

Main flowering time

July to September

How to cultivate

From cuttings about 5 to 6 months are required to produce fully grown flowering plant

special culture remarks

Very healthy cultivar, USDA zone 4 to zone 9

Flower colour

Soft pink

Size and form of single flower

individual flowers in dense whorls of up to 30

Complete flowers

Terminal verticillaster up to 12 cm in length, individual flowers in whorls of about 30

Photos applicant:

seedling of *Centaurea montana* 'Carnea'
Rijnbeek Perennials
2015
Rijnbeek Perennials
2022
yes, under application
no

How different/ which is the most similar existing var.:

darker pink than 'Carnea' and 'Tricolor', the base of a flower is purple, then red and finally changing to pink

Short description of the cultivar leaves, flowers:

form of leaves and flowers are the same as other *Centaurea montana*

Way of propagation and the preferable method:

like other *Centaurea montana*, division

Growth and habit (erect, compact ...):

same height as width

Height (cm): leaves/with flowers:

+/- 20/30 cm

Main flowering time:

Jun\Jul, post-blooming in Aug\Sept

How to cultivate:

sunny and not to high humidity of the soil, when to wet, more problems with mildew

Flower colour (if possible use the RHS Colour Chart):

pink/red/purple

Size and form of single flower:

4x 4 cm

Size and form of complete flowers:

4 x 4 cm

Description of the leaves:

narrow leaved, grey/green, about 6 to 8 cm long

1.

Name: **Geranium shikokianum 'MVNG1402' (CONFETTI)**

Origin of the cultivar (seedling of..., sport of..., hybrid of... etc.): **seedling**

Originator / Breeder or Selector: **Marco van Noort Breeding bv, Warmond, Netherlands**

Year of origin: **2013**

Introducer to the Commercial market* (company name and adress): **Marco van Noort Breeding bv, Warmond, Netherlands**

Year of indroduction: **2022**

Does the cultivar enjoy any type of protection rights: **EUPBR 2021/2617**

Was the variety apply to award before/when? **no**

Short description of the cultivar leaves, flowers: **Compact garden Geranium with fresh green felty leaves. From May follow soft pink flowers with dark veins. Blooms very richly until August and remains a beautiful ground cover with its fresh green leaves with some after flowering in September. Flowers are visited by insects. In late summer the leaves turn into beautiful autumn tones in red orange purple. Suitable as ground cover in the garden or as pot plant on the terrace. This Geranium is best grown in 2.5-to-3-liter containers. Seedling of G. shikokianum.**

Height (cm): leaves/with flowers: **20/30**

Main flowering time: **May-August**

How to cultivate - preferable place: soil, humidity, stand (shadow, half shadow, sunny): **sunny, semi-shade**

Flower colour (if possible use the RHS Colour Chart): **Soft pink with dark veins**

Photos applicant:

Protection rights

EU PBR 59712; US PP 31.348

Was the variety applied to award before

No

How different/which is the most similar existing var.

Lavatera 'Duet' shows three different large rotate flowers that are light red purple, lighter red at the same time purple or white in colour.

Short description of the cultivar leaves, flowers etc.

Large rotate flowers that are arranged in terminal racemes or axillary. It's freely flowering in habit with about 16 flowers developing per inflorescence.

Way of propagation and the preferable method

Softwood cuttings

Growth and habit

Upright and somewhat outwardly spreading plant habit. Vigorous growth, freely branching.

Height (cm)

100

Main flowering time

Late June to September

How to cultivate

From cuttings about 5 to 6 months are required to produce fully grown flowering plant

special culture remarks

Lavatera 'Duet' has been observed to have good garden performance and to tolerate rain, wind, drought, temperatures ranging from about -12C to about 40°C and to be suitable for USDA Hardiness Zones 8 to 11

Flower colour

light red purple-colored flowers, lighter red purple-colored

flowers and white-colored flowers

Size and form of single flower

Large rotate flowers, 8 cm

Complete flowers

Inflorescence length is about 40 cm, carrying upto 20 flowers

Description of the leaves

Ovate in overall outline, palmately lobed. Densely pubescent.

Name: **Limonium gmelinii 'STE 10' (DAZZLE ROCKS)**

Origin of the cultivar (seedling of..., sport of..., hybrid of... etc.): **Seedling, parents unknown**

Originator / Breeder or Selector: **Peter van Steijn**

Year of origin: **2012**

Introducer to the Commercial market* (company name and address): **Plantipp BV**

Year of introduction: **2020**

Does the cultivar enjoy any type of protection rights: **USA Plant Patent PP28,761 and EU PBR 20210420**

Was the variety applied to award before/when? **no**

How different/ which is the most similar existing var.: **Limonium 'STE10' is more compact than common varieties. It also has a larger amount of flowers.**

Short description of the cultivar leaves, flowers: **Limonium DAZZLE ROCKS is selected for its compact habit and the large amount of flowers per stem. You can enjoy the flowers from early summer into fall. Dazzle Rocks becomes about 40 cm tall and wide and is well branched. As it is drought- en heat resistant, it is perfect for xeriscaping. Also very nice in containers and for rock gardens or landscaping. Plant DAZZLE ROCKS in full sun in an, ideally, sandy and well-drained soil. This Limonium is not only very suitable for warm and dry climates, it also resists cold temperatures to -30 °C.**

Way of propagation and the preferable method: **TC**

Growth and habit (erect, compact ...): **Upright, compact**

Height (cm): leaves/with flowers: **ca. 40 cm**

Main flowering time: **Early summer into fall**

How to cultivate - preferable place: soil, humidity, stand (shadow, half shadow, sunny): **Full sun / ideally sandy, well-drained soil**

Flower colour (if possible use the RHS Colour Chart): **Blue-purple**

Size and form of single flower: **Average of 3 mm in height and diameter, 7 mm in depth.**

Size and form of complete flowers: **An average of 28.6 cm in height and 16.9 cm in diameter.**

Description of the leaves: **Green**

Year of origin: **2016-2017**

Introducer to the commercial market*: **Vitroflora Grupa Producentów (in Europe)**

Year of introduction: **2020-2021**

Does the cultivar enjoy any type of protection rights: **PP29603, CPBR6262**

Was the variety applied to award before/when? **no**

How different/ which is the most similar existing var.: **The most similar variety will be Penstemon 'Dark Tower', 'Midnight Masquerade' have dark pink flower**

Short description of the cultivar leaves, flowers: **Midnight Masquerade' produces a sturdy clump of deep burgundy purple leaves. The dark colour of the foliage is most pronounced in direct UV sunlight. This variety's dark foliage can be enjoyed all season.**

Rich lavender purple flowers have pure white interiors and are produced on dark stems just above the foliage. An improvement on other varieties, this superior selection boasts a fuller, more refined habit, more vibrant flower colour, and a more consistent, floriferous flowering performance.

Way of propagation and the preferable method: **Vegetative by cuttings**

Growth and habit (erect, compact ...): **Upright habit**

Height (cm): leaves/with flowers: **50/100**

Main flowering time: **June- July**

How to cultivate - preferable place: soil, humidity, stand (shadow, half shadow, sunny): **sunny place**

Flower colour (if possible use the RHS Colour Chart): **Pink shades**

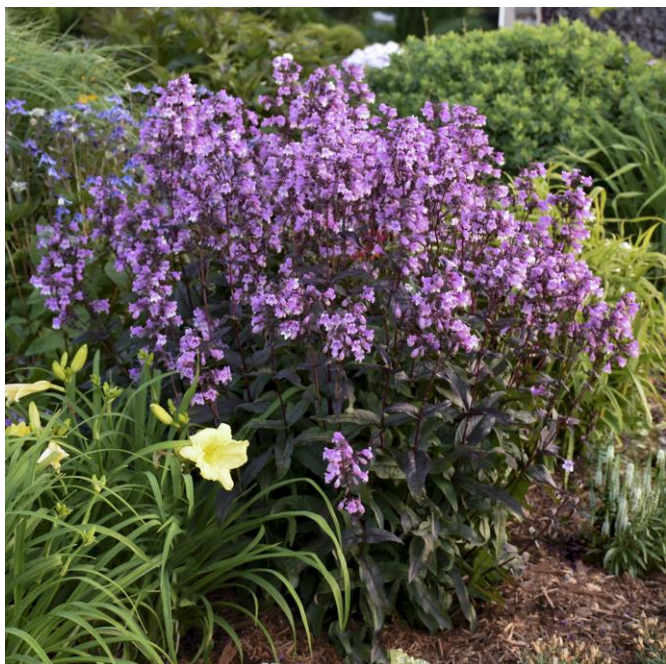

Size and form of single flower: **Trumpet, 4-5 cm long**

Size and form of complete flowers: **Panicle**

Does the cultivar enjoy any type of protection rights: **EU PBR (2020/3379) and US Plant Patent (PP30,348)**

Was the variety apply to award before/when? **no**

How different/ which is the most similar existing var.: **The parent plant of 'Dream Dazzler', 'Plum Dazzled', differs from 'Dream Dazzler' in having foliage that is not variegated and solid purple in colour. 'Dream Dazzler' can also be most closely compared to the cultivars 'Lajos' (U.S. Plant Patent No. 14,421) and 'Dazzleberry' (U.S. Plant Patent No. 22,457). 'Lajos' is similar to 'Dream Dazzler' in having variegated foliage and a flowering period in late summer. 'Lajos' differs from 'Dream Dazzler' in having foliage colours with green centres and creamy-white margins, leaves that are twice as larger in size, a taller plant height and fewer stems. 'Dazzleberry' is similar to 'Dream Dazzler' in being a ground-cover type Sedum and in having similar flower characteristics. 'Dazzleberry' differs from 'Dream Dazzler' in having leaves that are non-variegated and light purple in coloration, an earlier blooming period (2 to 3 weeks earlier) and leaves that are slightly larger in size.**

Short description of the cultivar leaves, flowers: **'Dream Dazzler' exhibits a very compact plant habit with stems that do not flop, 'Dream Dazzler' reaches about 23 cm (9 inches) in height and 46 cm (18 inches) in spread (unique for a variegated Sedum), 'Dream Dazzler' exhibits unique variegated foliage colours; under full sun exposure leaves are dark purple with hot pink margins, under part sun exposure leaves are light purple with hot pink margins, under shade conditions leaves are blue-green with white and pink margins.**

Way of propagation and the preferable method: **Cuttings**

Growth and habit (erect, compact ...): **Compact, spreading**

Height (cm): leaves/with flowers: **ca. 23 cm in height (without flowers)**

Main flowering time: **Summer**

How to cultivate - preferable place: soil, humidity, stand (shadow, half shadow, sunny):

Well-drained soil, prefers sun.

Flower colour (if possible use the RHS Colour Chart): **Pink**

Size and form of single flower: **Perfect, spreading, 5-starred. Flower size.–About 4 mm in depth and 1 cm in diameter.**

Size and form of complete flowers: **Dense, slightly rounded cymes with an average of 3 terminal forked branches at terminus and upper lateral nodes, blooms are present on top of the plant. Inflorescence size.– An average of 4 cm in diameter and 5 cm in depth (inclusive of forked branches) per individual cymes and up to 9 cm in length and 6 cm in width for the compound cyme, and up to 17 cm in width and 10 cm in depth for all cymes on a stem.**

Description of the leaves: **Thick, succulent.**
